▶ AGILE PROJECT MANAGEMENT

# Agile project management simplified with Jira

In contrast to classic projects, agile project and process management works in a very dynamical and flexible way. The planning horizon is noticeably shorter because the goal is to realize any changes concerning the scope of service at within a short period of time.This requires a higher amount of adaptability and personal responsibility on the developers' part. The work takes place in so called sprints or iterations, in which the extraditable product increments are created. Agile methods were originally designed for software development. Thanks to their collaborative and efficient nature, at this point, they are also used in product development and services of various lines of business as well as in other corporate divisions like personnel department, sales, purchasing or marketing.

Atlassian functionality concerning agile project management

▶ agile project management "out of the box"
▶ agile Jira tools for central time management for projects, accounts, and tasks
▶ support for hybrid working methods through a combination of agile project management and other methods like the waterfall model
▶ sprint management functionalities like creating, starting, completing, deleting, or restoring sprints and many more
▶ expansion of Jira to include special sprint permissions
▶ support through Scrum with proper roles, responsibilities, and meetings
▶ support through Kanban

Our services for your agile project management with Atlassian

▶ consulting concerning licensing and acquisition of your Atlassian licenses
▶ consulting and support from piloting to roll-out
▶ installation and implementation of Atlassian products
▶ masks, arrays, and workflows adjusted to your requirements
▶ definition and implementation of the roll and authorization concept
▶ scalable configuration of the Atlassian tools and add-ons
▶ implementation of all necessary reports and dashboards
▶ integration of Atlassian products into existing intranet solutions, realization of linkage to databases
▶ trainings and workshops for users, key users, and administrators

Your advantages

▶ more flexibility concerning your project's execution leads to an improved project success
▶ higher flexibility regarding changing requirements on the part of your client
▶ increased motivation thanks to the higher amount of personal responsibility for your employees
▶ smaller risks thanks to a shorter project period
▶ higher product quality through a quicker detection of errors
