

## Efficient project portfolio management with Jira and Confluence

For the project portfolio management of complex projects, it is essential to have powerful tools at hand. The planning tools do not only have to cover all project phases from the idea to planning to development to the finalization, but also be suitable for various approach models from waterfall to agile work with Scrum.

Project portfolio management with Jira supports portfolio managers in organizations of any kind and size, so that they can centrally manage their time, teams and budgets and can efficiently reach the project's goals. Jira supports the whole project portfolio process from the initial idea to finalizing the project in the context of the whole portfolio.

### Atlassian functionality concerning project portfolio management

- portfolio road maps adjusted to your enterprise's goals and available teams
- Gantt charts to display project status and task / to-do lists
- project categorizations thanks to user-defined parameters like meaning, probability of success, available budget, expected income, risks, etc.
- display of coherent initiatives with common results
- management of all relevant portfolio details
- real-time reports, flexible workflows, and individually adjusted dashboards
- support for agile project management with Scrum boards and Kanban boards

### Our services for your project portfolio management with Atlassian

- consulting concerning licensing and acquisition of your Atlassian licenses
- consulting and support from piloting to roll-out
- installation and implementation of Atlassian products
- masks, arrays, and workflows adjusted to your requirements
- definition and implementation of the roll and authorization concept
- scalable configuration of the Atlassian tools and add-ons
- implementation of all necessary reports and dashboards
- integration of Atlassian products into existing intranet solutions, realization of linkage to databases
- trainings and workshops for users, key users, and administrators

### Your advantages

- efficient support for project planning in the context of the whole portfolio
- higher efficiency through systematically planned cooperation across teams
- guaranteed quality thanks to process consistency / continuity from the idea to the result / start to finish
